Okay DRS mine background data is fine but I still need other similar data.  
Do you have similar kind of data for the Mormon Farm background area and other background areas you used for other mineral belt sites. I need to compare all background data used in other mineral belt sites to the background area used at Mormon Farms.

Thank you!

Jon:

you may want to send these over the Ghassan, these are the backgrounds from the sites in the San Mateo Creek Basin that LaDonna has been looking at. These would add to the overall background picture in the Basin.

Please see the attached spreadsheet with the mine data from my mine assessments. Let me know if you need anything else.

Thanks,

Buster
